4' x 8'	8' Wide (2 pieces 45" W x 74" L) - Ships LTL Freight	
Custom Profiles	Custom Available	Custom Available

Cargo Trailer Stone Guard:

- **Recommended Gauge: 17 GA to 22 GA**
- **Thinner gauges provide flexibility for curved or radius installations while protecting against road debris and wear.**

Ramp Metal:

- **Recommended Gauge: 17 GA to 14 GA (heavier-duty options available in 12 GA and 8 GA)**
- **Thicker diamond plate offers increased durability and enhanced anti-slip traction with its raised pattern.**

Floor Tiles / Driving Strips:

- **Installation: Adhered directly to the subfloor**
- **Use: Cover wall-to-wall or install in driving strip patterns for targeted floor protection.**

Custom Designs: Material Options: Available in Stainless Steel, Brushed Aluminum, Diamond Plate, and Painted Anodized Aluminum colors.

Weight Consideration:

For most cargo trailer applications, a thinner gauge is recommended to minimize added weight without sacrificing protection and functionality.

All materials proudly made in the USA and custom fabricated to your project specifications.
