

GARAGE FLOORS

Does your garage make you happy?

RACEDECK®
GARAGE FLOORS

The World's Leading
Garage Floor System

WHY RACEDECK? My Garage Makes Me Happy™

With over 30 years of engineering quality, the multi-patent RaceDeck® is the industry leader in modular flooring. RaceDeck® is engineered to withstand the toughest of mechanical environments resisting oil, antifreeze, brake fluid, gasoline, and household chemicals.

Easy to Install

No Tools & No Mess. With RaceDeck® you simply "snap" together your floor creating a high-tech finished look in just hours, not days. Go from 'ordinary' to 'extraordinary' in no time with RaceDeck®!

Clean Finish

Installing edge trim modules will finish off the display floor for a clean, tapered edge.

Many Colors To Choose From

RaceDeck® products are available in many standard colors as well as custom colors. The Diamond, FreeFlow, CircleTrac, Tuffshield, RaceDeck Pro & RaceDeck XL are all interchangeable allowing you to create that personalized custom look.

"Wow! In a matter of hours, my garage went from 'ordinary' to 'extraordinary'. I was amazed at how fast and easy RaceDeck was to install..."

Fred Kaimer - California

The definite choice over Epoxy coatings!

IS GREAT FOR

Garages:

Easy to install; no tools & no mess. RaceDeck® is not affected by oil, gasoline, anti-freeze, brake fluid or UV radiation.

Car Shows:

Portable and lightweight; enhance your show vehicle's appeal.

Indoor and Outdoor Displays:

Highlight new models and products on your sales floor

Mobile Showrooms:

Enhance the overall appearance of your rig and company image.

Will not be damaged if foundation concrete cracks	✓	✗
Easily and quickly repaired if damaged	✓	✗

"We are REALLY happy with the RaceDeck flooring. It has made our shop look so much better. We drive forklifts, cars, dollies, jacks, and about everything else you can think of on it"

David Kirkham, President - Kirkham Motorsports

RACEDECK

Residential Applications

RaceDeck floors are great for garages, basements, aircraft hangars, commercial garages, trade show exhibit floors, and more. Installing RaceDeck requires no glues or chemicals, so there's no mess or toxic fumes - each module simply 'Snaps' into place! Our products are proudly made in the USA.

"RaceDeck is definitely the world's leading modular garage flooring company. Great folks and a really cool product!"

"At Macc Racing we are extremely impressed on how easy RaceDeck is to install, it took us little over 1 day to do the entire shop. RaceDeck has totally transformed our Shop, it looks totally amazing and is extremely durable & strong. We highly recommend RaceDeck "

Chris MacClugage/ MaccRacing.com,
13 Time World Watercraft Champion

RACEDECK

Commercial Applications

RaceDeck® commercial floors can be found everywhere, from your local speed shops and dealerships to some of the most famous garage builders on TV. Over 30 years of technology has gone into the "multi-patent" garage floor system.

Diamond FLOORING STYLES

Diamond

- The original diamond tread garage floor system.
- One of the most popular garage flooring styles worldwide.
- Offers great slip resistance and a high-tech look.
- The design is engineered to create a seamless look from module to module, allowing you to create virtually any size and any floor pattern.
- Optional edging gives your floor a finished look.
- Easy to clean surface, resistant to petroleum products and most chemicals.
- Available with TuffShield Finish.
- Interlocks with all RaceDeck® flooring products but REvolution.
- Patent Pending.
- MADE IN THE USA!

PowerLock™ Technology

Engineered to handle heavy vehicle loads with 16 PowerLocks™ per module becoming part of the superstructure when engaged. The multi-patented Step-N-Snap design makes for **easy installation** – no tools, no glues, and no toxic mess.

Diamond Superstructure

Functions as one piece, making the system perfect for applications with big temperature swings. Supports rolling loads of over 50,000 pounds!

COLOR OPTIONS

Graphite		White		Orange	
Alloy		Beige		Yellow	
Black		Royal Blue		Custom Colors Available	
Red		Royal Purple			

"Prior to purchasing my floor, I researched and compared all of the options and it quickly became clear that RaceDeck was by far the highest quality garage floor out there. Once I made my choice I called RaceDeck and the entire experience was fantastic, I love my floor and I highly recommend your company to my friends and colleagues."

Bob Bondurant - American racing legend

CircleTrac® FLOORING STYLES

- Traditional coin top pattern garage flooring – a classic design found in many industrial applications and famous garages around the world.
- The design is engineered to create a seamless look from module to module, allowing you to create virtually any size and any floor pattern.
- Optional edging gives floors a finished look.
- Easy to clean surface, resistant to petroleum products and most chemicals.
- Available with TuffShield Finish.
- Interlocks with all RaceDeck® flooring products but REvolution.
- Patent Pending.
- MADE IN THE USA!

PowerLock™ Technology

Engineered to handle heavy vehicle loads with 16 PowerLocks™ per module becoming part of the superstructure when engaged. The multi-patented Step-N-Snap design makes for **easy installation** – no tools, no glues, and no toxic mess.

Diamond Superstructure

Functions as one piece, making the system perfect for applications with big temperature swings. Supports rolling loads of over 50,000 pounds!

RACED EOK

"When you factor in the durability, flexibility of design, and easy installation, they were the clear choice for me, they are the top of the heap in garage floor tiles. Throw in the superb customer service, lightning fast shipping, and they were the clear choice for me."

Dan DeMarchis , Virginia

"The quality, design flexibility, durability and ease of installation made this a no-brainer. Moreover, the customer service and follow-up were first class!"

John Halliburton - Texas
